

AZTLAN Equity Management Announces New Strategic Partnership with Grupo Inversiones Monterrey and Masttro

McLean, VA. 18, 2018 -- AZTLAN Equity Management, the independent investment boutique specializing in global small and mid-cap equity strategies, is pleased to announce a new strategic partnership with Grupo Inversiones Monterrey and Masttro.

This new strategic partnership will solidify the investment management collaboration between the three firms that started in January 2018, by making AZTLAN's global SMID cap equity strategies and capabilities broadly available to Mexico-domiciled individual as well as institutional investors. At the same time, the addition of private equity and venture-capital specialist Grupo Inversiones Monterrey to AZTLAN's investment committee brings substantial hands-on business expertise and management acumen to the overall investment process. Equally important is the integration of Masttro's unparalleled technology and robust wealth management platform that serves high net worth individuals and family offices around the world, which now provides seamless and transparent back-office solutions to AZTLAN's investor-clients and funds.

"This strategic alliance not only strengthens our disciplined investment process and platform but also allows us to leverage our investment management capabilities to serve the individual and institutional family office segments in Mexico" said Alejandro H. Garza Salazar, CIO and portfolio manager of AZTLAN.

About Grupo Inversiones Monterrey
